

Your local Cheshire Green Doctor can offer help and support through these trying times!

The Green Doctor programme which is fully funded by all the Cheshire Council's, is in place to help households deal with concerns over their energy costs and how they could be reduced. We would normally carry out home visits, but for now we're here to offer our services over the phone, by email or Facetime and follow up with a visit later. This is a valuable service at this time, especially as we're potentially isolated and spending more time at home due to the Coronavirus.

We're part of the Groundwork Trust, a Charitable organisation which helps support disadvantaged communities. This is a totally FREE service, we're here to provide support you in any way that we can

We're based in Northwich, but cover the length and breadth of Cheshire

Don't sit at home and worry, please make contact and one of our Green Doctors will phone you and help to put your mind at ease.

We're here to support, please don't hesitate to contact us, we're here for you!

Once all this is over, we can make a visit, bring along some light bulbs and other energy saving measures and help you get on top of your energy bills & concerns; and guide you towards other organisations who may be able to help you further.
